REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The present invention is directed to copy protection device. The independent claims identify the uniquely distinct feature "a first macro block of a discrete cosine components from a first luminance signal, a second macro block of discrete cosine components extracted from a first-color difference signal and a third macro block of discrete cosine components extracted from a second color-difference signal, and wherein the second data includes three macro blocks of discrete cosine components extracted from each of the three luminance signal, the three luminance signals and the first luminance signal are portions of a main luminance signal." The closest prior arts, Timmermans (US Pat. No. 5, 583,653) and Uchida (US Pat. No. 5,691,819), either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
